Drawings

1. Figures 6A and 6B are objected to because they are not labeled as "prior art" as they are described on pages 2 and 3 of the specification.

See MPEP § 608.02(g).

Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities:

On pages 2 and 3, it is not clear if the figures 6A and 6B which are discussed are those in the instant application or in the Japanese reference JP-A-2000-103374 which is cited on page 2.

It is not clear what is meant by the term "related art" used on pages 6 and 10. If this is meant to refer to the prior art, then the term "prior art" must be used. If this is meant to refer to some patent or application or publication, then the art should be identified as such.

Art Unit: 3617

3. The use of the trademark "tetron" has been noted on page 8 in this application. This term should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Appropriate correction is required.

Allowable Subject Matter

4. Claims 1-6 are allowable over the prior art of record.

Conclusion

5. This application is in condition for allowance except for the formal matters noted in paragraphs 1-3 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show elastic crawler belts
